Anti-Aurora A Rabbit mAb [97B07]

Catalog No.: A52016

Basic Information

Catalog No. (Cat.No.)	A52016
Host species	Rabbit
Reactivity	Human
Applications	WB,IHC,IP,IF,ELISA
Synonyms	Aurora A,Aurora-A,AIK,ARK1,STK6,STK7,ARK1,BTAK,PPP2R1B,AURK1

Product Information

Target	Aurora A
Molecular Weight(Calculated)	45 kDa
Molecular Weight(Observed)	45 kDa
Isotype	IgG,Kappa
Conjugation	NA
Concentration	0.2 mg/ml
Clonality	Monoclonal
Clone No.	97B07
RRID	NA
Storage buffer	50% Glycerol, 0.05% BSA and 0.05% preservative in PBS (pH 7.2-7.4)
Storage	Stored at -20°C for 1 year. Avoid repeated freeze / thaw cycles.
Shipped at conditions	Frozen
Form	Liquid

Ablumir
Built Around Immunology

Product Usage Information

Application	Dilution
WB	1:1000-1:5000
IHC	1:200-1:1000
IP	1:50-1:200
IF	1:200-1:1000
ELISA	1:5000-1:20000

Target Information

Protein Name	Aurora kinase A
Gene Name	*AURKA*
Domain	NA
Background	Aurora A is an essential isoform of the Aurora serine/threonine kinase family encoded by the AURKA gene, which serves as a master regulatory kinase for G2/M phase transition during the cell cycle. Localized at centrosomes and spindle poles and highly activated in prophase, Aurora A dominates centrosome maturation, spindle microtubule assembly, chromosome polarity establishment and G2/M phase transition, precisely controlling mitotic initiation and progression. Abnormal activation and overexpression of Aurora A induce centrosome amplification, spindle disorder and cell cycle dysregulation, promote unlimited proliferation and malignant transformation of tumor cells, and are frequently upregulated in various malignancies, making it a core target for tumor proliferation research and targeted drug development. Anti-Aurora A Rabbit mAb [97B07] is a rabbit specifically recognizing endogenous Aurora A, compatible with multiple immunological assays and suitable for cell cycle, tumorigenesis and targeted mechanism research.
