Target Information

Protein Name	α-Tubulin (Acetyl Lys352)
Gene Name	*TUBA*
Domain	human TUBA1B,around Acetylation site of Lys352, aa 311-360
Background	α-Tubulin belongs to tubulin family and participates in microtubule assembly, spindle formation and intracellular transport. α-Tubulin heterodimerizes with β-Tubulin to form protofilaments that constitute the minus end of microtubules. Post-translational modifications including acetylation and tyrosination modulate microtubule stability.
