Target Information

Protein Name	Alpha-tubulin
Gene Name	*TUBA*
Domain	human Tubulin alpha, aa 402-451
Background	α-Tubulin belongs to tubulin family and participates in microtubule assembly, spindle formation and intracellular transport. α□Tubulin heterodimerizes with β□Tubulin to form protofilaments that constitute the minus end of microtubules. Post-translational modifications including acetylation and tyrosination modulate microtubule stability.
