Anti-FOXP3 Rabbit pAb (A73006)

Catalog No.: A73006

Basic Information

Catalog No. (Cat.No.)	A73006
Host species	Rabbit
Reactivity	Human,Mouse,Rat
Applications	WB,IHC,ELISA
Synonyms	FOXP3,JM2,AIID,IPEX,PIDX,XPID,DIETER

Product Information

Target	FOXP3
Molecular Weight(Calculated)	47 kDa
Molecular Weight(Observed)	NA
Isotype	IgG
Conjugation	NA
Concentration	1 mg/ml
Clonality	Polyclonal
Clone No.	NA
RRID	NA
Storage buffer	0.05% preservative in PBS (pH 7.2-7.4)
Storage	Stored at -20°C for 1 year. Avoid repeated freeze / thaw cycles.
Shipped at conditions	Frozen
Form	Liquid

Ablumir
Built Around Immunology

Product Usage Information

Application	Dilution
WB	1:1000-1:2000
IHC	1:200-1:2000
ELISA	1:5000-1:20000

Target Information

Protein Name	Forkhead box-P3
Gene Name	*FOXP3*
Domain	NA
Background	FOXP3 (Forkhead Box Protein P3) is a specific member of the forkhead box transcription factor family, specifically expressed in human regulatory T cells (Treg). It plays a core role in regulating immune homeostasis, maintaining immune tolerance and inhibiting inflammatory responses. As a key transcription factor for the development and functional maturation of Treg cells, FOXP3 regulates the expression of multiple immune-related genes, inhibits the excessive activation of effector T cells, reduces abnormal immune responses and avoids autoimmune damage. Downregulated expression or functional defects of FOXP3 lead to Treg cell dysfunction and disrupted immune tolerance, causing autoimmune diseases such as systemic lupus erythematosus and rheumatoid arthritis, and facilitating tumor immune escape and tumor proliferation and metastasis.
